improving the health and
wealth of the nation
through research

The National Institute for Health
Research School for Primary Care
Research (NIHR SPCR) is a
partnership between the
Universities of Bristol, Cambridge,
Keele, Manchester, Newcastle,
Nottingham, Oxford, Southampton
and University College London.

Funded by

NHS

National Institute for
Health Research

- **An onsite 3-day symposium in Toronto**

- **Two 3-week online research skill development workshops - June and November**

- **Two 7-8 week online interdisciplinary discussion groups - September to November and January to March**

- **Autumn - present your own research project to peers and receive interdisciplinary feedback**

“ Mentors are, like the trainees, from a wide range of Primary Care backgrounds, and being able to chat to all of them informally was a great way to understand exactly how primary care can really benefit from collaborative, interdisciplinary research teams.”

Ben Ainsworth, post-doctoral fellow

- Winter - work with an interdisciplinary team to create a primary health care research project
- Trainees accepted to the program will have their research supervisor participate in aspects of the program.
- At the end of the program trainees will be able to complete an interdisciplinary primary health care research proposal

“I greatly benefitted from being a part of the TUTOR-PHC training. Primarily, this training course has offered insights into the contribution and role of multiple disciplines in enriching primary care research.”

Jasmin Knopp

“On the first day each mentor presented some of their work in a poster session. There was a lot of inspiring and novel research on view and for me it was really interesting to see what primary care research looks like outside the UK.”

Ben Fletcher
