

10.00 - 11.00	Registration, refreshments and poster hanging	FR16 working group meetings		
11.00 - 11.10	Welcome <i>Richard Hobbs</i>			
Plenary SESSION				
11.10 - 11.30	Plenary 1: ATAFUTI: Alternative Treatments of Adult Female Urinary Tract Infection. <i>Michael Moore</i>			
11.30 - 11.50	Plenary 2: Derivation and validation of prediction models to estimate future risk of primary hip replacement in primary care in the United Kingdom. <i>Dahai Yu</i>			
11.50 - 13.00	Parallel SESSION 1			
	Older people	Musculoskeletal	Widening involvement in research	Patient safety
	Access to social care and its influence on healthcare utilisation for older adults: a systematic review of international evidence. <i>Gemma Spiers</i>	How do physiotherapists approach analgesic use in patients with hip osteoarthritis? Findings from a mixed methods study. <i>Melanie Holden</i>	Trials need participants but not their feedback? A scoping review of measures of participant experience of taking part in trials. <i>Claire Planner/Peter Bower</i>	Barriers and enablers for the adoption of patient safety tools to improve patient safety in UK primary care. <i>Katherine Perryman</i>
	Frailty scores to predict mortality in older people using data from population based electronic health records: case control study. <i>Daniel Stow</i>	Using primary care records to describe patterns in the annual prevalence, incidence and management of carpal tunnel syndrome over a 20 year period. <i>Claire Burton</i>	Can we value patient and public involvement (PPI) in primary care research using health economic methods? <i>Steven Blackburn</i>	Determining the extent of delay in consulting for, and the diagnosis of, giant cell arteritis in primary care. <i>James Prior</i>
	Empowering older people with multimorbidity to improve safety in primary care: Development and feasibility study of an intervention to support effective communication. <i>Rebecca Hays</i>	Risk of fragility fracture among patients with psoriasis: A population based matched cohort study from the United Kingdom. <i>Rebecca Whittle</i>	The Child and Adolescent Musculoskeletal Pain (CAM-Pain) Study: A Feasibility Study testing a way of identifying, recruiting, and collecting data from children and adolescents in Primary Care. <i>Zoe Michaleff</i>	Anticholinergic drugs and the risk of dementia: a nested case control study. <i>Carol Coupland</i>
		Testing mediators of the effects of the COgnitive Patient Education (COPE) intervention for low back pain. <i>Gemma Mansell</i>	Strategies to recruit ethnic minorities to clinical trials in the UK: Systematic Review. <i>Yumna Masood</i>	The changing incidence of poisonings amongst young people in England, 1998-2014. <i>Edward Tyrell</i>
13.00 - 13.45	Lunch			
13.45 - 14.30	Manned poster session			

14.30 - 15.40				
Parallel SESSION 2				
	Cardiovascular	Common conditions	Service development	Big data & electronic health records
	Establishing research priorities to improve the management of patients with advanced heart failure using the James Lind Alliance method. <i>Clare Taylor</i>	Increased risk of mortality following recorded presentation of symptoms of breathlessness and wheeze in primary care: a matched cohort study using electronic health records. <i>Ying Chen</i>	What are the experiences and support needs of migrant women exposed to domestic violence in healthcare? A qualitative study and synthesis. <i>Nadia Khelaifat</i>	rEHR: An R package for manipulating and analysing Electronic Health Record data. <i>Evan Kontopantelis</i>
	Primary care interventions to improve uptake and adherence to exercise/activity programmes in people with peripheral arterial disease related intermittent claudication (PAD-IC): a systematic review. <i>Ricky Mullis</i>	Andrographis Paniculata for symptomatic relief of respiratory tract infections in adults and children: a systematic review and meta-analysis. <i>Xiao-Yang Hu</i>	Service Users and Supporters Working Better Together: Facilitating mutual support for mental wellbeing between people living with chronic physical conditions and their supporters. <i>Gemma-Claire Ali</i>	Identifying risk of diabetes using an artificial neural network in primary care: comparative cohort study. <i>Tim Holt</i>
	Understanding Telehealth in Heart Failure. <i>Christine A'Court</i>	The impact of linking weight with health on patient outcomes in a brief intervention for weight loss. <i>Charlotte Albury</i>	Supporting family carers to care for their relatives at end of life - A role for the internet? <i>Nathan Davies</i>	External validation of risk prediction models for incidence of colorectal cancer using UK Biobank. <i>Juliet Usher-Smith</i>
		Acute Flares of Knee Osteoarthritis in Primary Care: A Feasibility and Pilot Study Process Evaluation. <i>Martin Thomas</i>	Individual factors associated with self-reported measures of cold homes during winter. <i>Claudio Sartini</i>	Can electronic medical records be used to identify a prodromal syndrome for rheumatoid arthritis? <i>Sara Muller</i>
15.40-16.00				
Refreshments				
Plenary SESSION				
16.00 – 16.20	Plenary 3: Risk of fragility fracture among patients with gout and the impact of urate-lowering therapy. <i>Alyshah Abdul Sultan</i>			
16.20 – 16.40	Plenary 4: An automated software system to promote anticoagulation. <i>Tim Holt</i>			
16.40-17.00	Closing comments and prize-giving
